A **base word** is a word that has meaning by itself.

Example: portrait = a painting, drawing, photograph, or engraving of a person

You can change the meaning of a base word by adding letters to the beginning or end of it.

Example: The word *considered* in the passage below has an *-ed* ending. Take away the ending, and you have the base word consider.

*Marking Note: Only underline a base word when it has added letters to its beginning or end.*

☒ Underline these 19 **base words**

effect	oil	portrait (2)	skill	

Jan van Eyck is considered the father of oil painting. He was not the first to use oils, but he was unusually skillful with them. The way that he paints showed the true richness of colors and the effects of light. He paints mostly religious pictures and portraits. He was a serious painter, but some people think he had a humorous side. At times, he hid tiny self-portraits in his work. In the middle of one popular painting, he wrote, "Jan van Eyck was here."

A **suffix** is an ending attached to a base word to change its meaning.

Example: rich = (adjective) vivid and deep in color; *Her headband was a rich purple.*  
 rich(ness) = (noun) the quality of being pleasingly deep or strong in color; *His painting showed the true richness of colors.*

When you mark a suffix, make sure it's attached to a base word and isn't part of the base word itself.

Example: (-er) in paint(er) = suffix because it's added to the base word *paint*  
 -er in father = not a suffix because the letters *fath* do not spell a word in English
